## Offset your business carbon output through the planting of trees...

The EcoForce EcoPartner Program is an effective way your business can demonstrate your Green Credentials to your customers and contribute to repairing our planet's ecosystem.

### Business Owners...

This is your opportunity to join EcoForce Global Advocates around the world selling and planting trees to capture carbon from our atmosphere, and to help heal our planet.

This simple commitment program to purchase trees through EcoForce Global supports our mission to plant billions of trees around the world on farmland to sequester carbon and help Farmers store massive amounts of carbon in their soils. Each time a tree is purchased through your business, we update your purchasing history and estimated captured carbon amount for your business.

### Retailer – Bricks & Mortar Opportunity...

Display your EcoPartner sticker on your shop window, print your QR code on your merchandise and menu's - for every customer who scans your QR code and buys a tree, the carbon captured from each tree is added to your overall total for your business. This can be displayed for your customers to see your contribution to the planet.

Create a point of difference for your customers to do business with you by incentivising your customers to buy your product by offering an amount per purchase towards the purchase of more trees.

### Online eTailers...

You are provided with a widget of code that allows you to post your QR code, trees purchased, and carbon captured details, on your website. Customers can scan the QR code to buy a tree as well as view your current success rate of carbon captured. A great way to promote and display your Green Credentials.
