

Sustainability Transparency Responsibility Community

These four key terms frame and guide all the actions taken by EcoForce Global in all its operations and partnerships.

Sustainability...

If we cannot develop a structure that stabilises or rebuilds damaged and destroyed environments, our continued existence and reliance on nature will be lost.

Transparency...

Honest open accountability, clear reporting, and validated results, engender trust and ongoing support for our initiatives from diverse companies and governments around the world.

Responsibility...

If we as the current custodians of our planet cannot protect and care for the planet for our own needs, our children, and future generations, who will? We must stand up and be accountable for our actions.

Community...

We do not live alone on planet earth. As with responsibility, developing and working with communities from around the world, understanding their cultures and capacity to address these issues, will see us succeed in our mission. We are all a part of team Earth.

SUSTAINABLE DEVELOPMENT GOALS FROM THE UN

Our corporate mission aligns with **thirteen** of the **seventeen** UN Sustainable Development Goals.

Aligning your business and personal vision with EcoForce Global will create a powerful results-driven accountable partnership.
