

Fundraising while planet saving

EDUCATIONAL SCHOOLS FUNDRAISING CAMPAIGN

Through our **Schools Fundraising Campaign**, students will see first-hand how trees are the key to land repair and capturing carbon, reversing the impact to our planet of greenhouse gas emissions.

Your school has the unique opportunity to make 20% commission on all trees sold through your school fundraising drive, as well as making a difference in the fight to save our planet.

This is a hands-on approach for schools whereby the students learn through first-hand experience, the process of planting trees, their progress, and their impact on the land, while raising funds for their school from the Fundraising Campaign.

The process of tree planting...

- The trees will be planted on the closest available farm or land to the school.
- The school can visit the tree planting site & also assist with planting the trees where possible.
- A plaque with the school's name will feature alongside the trees at the planting site.
- The school will receive reports from EcoForce about carbon capture & the progress of the trees.
