The Company

OUR MISSION

By empowering people through knowledge & action; plant enough trees to sequester 30% of the worlds annual carbon output & create a living legacy for all.

OUR GOAL

One Billion Trees by 2030.

EcoForce was founded by Charles and Tracy Alder in 2020. After spending 8 years building one of Australia's largest charities supporting over 14,000 Farmers through drought, bushfires, and floods, they have a personal learned knowledge of the challenges that face Farmers and our environment.

During these 8 years, the scale of devastation wrought upon the Australian landscape through natural disasters was profound. At the same time, many countries around the world have also been grappling with changing climatic conditions, increased desertification, and diminished farming viability.

In the same way Charles and Tracy brought together Australians to help support Farmers and rural communities, the same philosophy has been engendered through **EcoForce Global** with the focus on intelligent and sustainable tree planting, farming viability, and land restoration.

The **EcoForce Mission** provides a holistic solution to land repair. Through the planting of trees on farmlands around the world we can improve the quality of the soil, improve the quality and health of livestock and produce, improve pasture growth, and store massive amounts of carbon from our atmosphere back into the soil where it belongs.

These practical solutions to sequester carbon made possible through the **EcoForce Tree Planting Program**, assist significantly to improve soil health, revegetate ravaged land, and help restore balance to our planet's ecosystems.

The great news is, anyone can be part of the solution because everyone is affected. You are invited to contribute and be part of a practical movement for change that really is making a difference.
